EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Michael Epstein on March 15, 2004. The application has been amended as follows:

2. The following changes have been made to the application in order to clearly describe the invention and to define the claimed invention over the prior art of record:

Claim 1 has been replaced with:

-- Claim 1. A parallel rule comprising two component rules each providing one of two opposed parallel straight edges, and a linkage allowing relative movement of the rules in a direction orthogonal to the straight edges but prohibiting relative movement in a direction parallel to the straight edges, wherein at least one component rule has at least one through hole suitable to receive the point of a pencil so as to make a line of latitude or longitude on a chart and the other of said component rules has a through hole in corresponding position to said at least hole of said one component rule. --

Claim 23: "claim 2", line 1, has been replaced with -- claim 1 --.

3. Claim 2 has been cancelled.

REASONS FOR ALLOWANCE

4. The following is an examiner's statement of reasons for allowance for Claims 1, 15-21 and 23-24: the prior art does not disclose or suggest a parallel rule including at least one component rule having at least one through hole suitable to receive the point of a pencil so as to make a line of latitude or longitude on a chart, and the other of said component rules having a through hole in corresponding position to said at least one hole of said one component rule in combination with the remaining limitations of the claims.

5. The following is an examiner's statement of reasons for allowance for Claims 25-26: the prior art does not disclose or suggest a method of making a line of latitude or longitude using a parallel rule including two component rules, wherein a first of said component rules has at least one through hole, placing a pencil point in the through hole in said first component rule while holding said second component rule still, moving the first component rule and the pencil point laterally away from said second component rule for making a second line on a chart orthogonal to a first line and in combination with the remaining limitations of the claims.

6. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for

Art Unit: 2859

Allowance.”

Lin (US 5,193,284)

Sturz (US 4,455,750)
